93% of online experiences
begin with search.

70% of the [links search users click](#) on are organic

85% of marketers said search marketing
was the most effective customer acquisition tactic

68% of global search traffic via Google; 19% via Bing

Why bother?

The higher you rank, the more traffic your website will get. Those ranked at number 1 get TEN times more traffic than those ranked at number 8.

More traffic means more customers.

Google Result Page Rank	Average Traffic Share
1	32.5%
2	17.6%
3	11.4%
4	8.1%
5	6.1%
6	4.4%
7	3.5%
8	3.1%
9	2.6%
10	2.4%

What is a Keyword?

The word or phrase a user types into the search engine

Google processes 6 billion queries per day

15% of search terms every day have never been seen before

A single keyword can easily have 800+ variations or similar keywords

All three of these are DIFFERENT keywords:

Short-Tail v1

“Hotels Brisbane”

V popular, lots of traffic
and huge competition

Short-Tail v2

“Brisbane Hotels”

V popular, lots of traffic
and huge competition

Long-Tail

“Cheap Hotel Deals in
Brisbane CBD”

Less popular, less traffic
and less competition

Step One: Know Your Keywords

Use Google's Keyword Planner tool to give suggestions.

Cheat Sheet

Website's Content
& How It Is
Optimised

Popularity Of The
Content

Backlinks

Technical Capacity
Of The Site

Your website needs to be well built, well structured, easy to navigate and not only full of great content that's viewed a lot by your visitors, but also has a lot of links to it from other websites.

Simple, huh?

Google measures over 200 different things when it ranks your website against a competitor.

On the plus side, you only have to do better than your competitor to get a better ranking.

30 most important ranking signals: <http://positiononly.com/blog/seo/google-ranking-factors>

Full list: <http://backlinko.com/google-ranking-factors>

Technical

Website Structure

Ease of navigation

URL formats

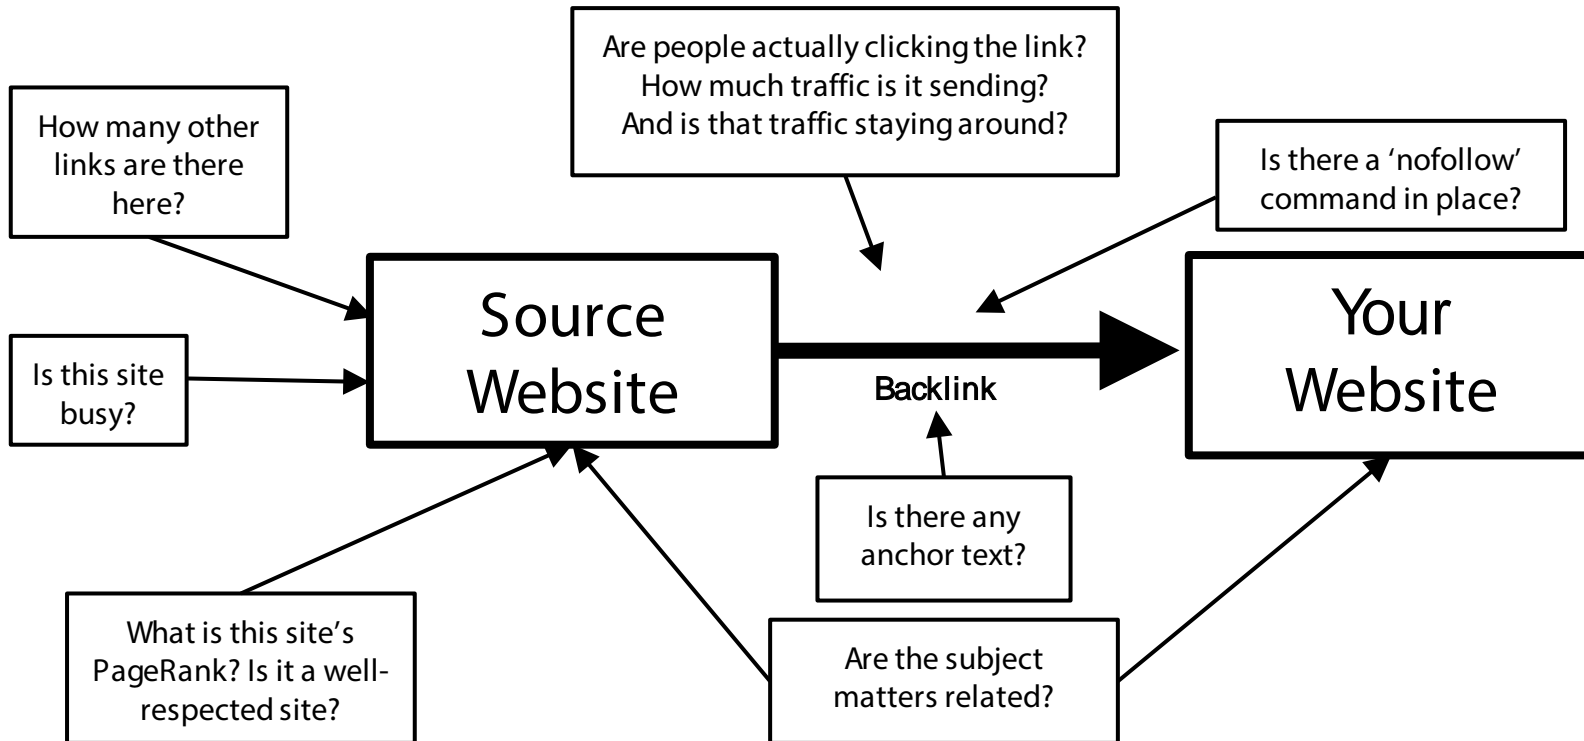

Server Location - closer to the person doing the search, the better

Age of domain

Backlinks

Backlinks

“Pagerank” is how a website’s value is measured.

Value can be different depending on source and destination websites relation to each other.

Is the link delivering quality traffic that is staying?

Is the link relevant?

Are people ‘liking’ the content?

Are people sharing on social media?

MORE backlinks is not necessarily a good thing.

Quality backlinks from busy, related websites is a good thing.

Backlinks

```
<a href="http://www.example.com">Example Anchor Text</a>
```

keyword goes here

```
<a href="http://www.twocentsgroup.com.au">Marketing Agencies</a>
```

This directly links the destination website with the keyword.

In the example above, the anchor text is directly associating TwoCents with 'Marketing Agencies'.

How do I get backlinks?

Backlinks

Ask other website owners to swap links

Write blogs & articles

List yourself on directory websites

Press releases

Review sites

Discussion boards

Full list of ideas here: <http://www.shoutmeloud.com/101-ways-to-get-quality-backlinks-to-your->

What is White Hat & Black Hat?

vs

What is RankBrain?

RankBrain

1. RankBrain is the third most important ranking signal in Google Search.
2. RankBrain was deployed several months before October.
3. RankBrain uses artificial intelligence to put written language into mathematical entities that computers can understand.
4. If RankBrain sees a word/phrase it doesn't know, the machine guesses what words/phrases might have similar meanings.
5. RankBrain specifically helps with never-before-seen search queries.
6. RankBrain is better than humans at guessing which results Google would rank number one for various queries.
7. RankBrain is the first Google search ranking signal that actually learns on its own.
8. Turning RankBrain off is as damaging to users as turning off half of Wikipedia pages.
9. RankBrain is so effective, Google engineers were surprised at how well it worked.
10. Machine learning is a major focus of Google right now.
